FLOORS LTD

INDUSTRIAL AND COMMERCIAL FLOORING SPECIALISTS

Our individual self-smoothing epoxy floors have been used in workshops, industrial units and bakeries for over 20 years. We are able to provide everything from a dust sealer to a heavy duty industrial floor suitable for fork lift trucks.

Extremely hardwearing fine quartz resin floors are used in retail areas, car showrooms, toilet and shower rooms, and nightclubs. All our floors are available in over 60 different colours and colour combinations.

For a contemporary office floor why not specify our resin bonded pebble effect. A seamless, extraordinary hardwearing surface, with a contemporary and spacious feel. This floor product is also suitable for, office receptions, restaurants, swimming pools and health and fitness spas.

Commercial kitchen areas require special consideration and our PU cement screed is the ideal solution.

It offers slip resistance, high strength and can withstand the effects of temperature, fats and sugars better than virtually any other type of resin floor.
